Chautauqua is Here

Strathmore's 1920 Chautauqua commences tomorrow, and promises to be bigger and brighter than ever, though the admission price remains the same. The committee in charge, handicapped as they are by the ruin of business preliminary to what is confidently hoped will be the biggest harvest in the history of the district, are attaching every effort to make this a record-breaker for attendance, and it looks as if their efforts will be attended by success. No one can afford to miss the inspiration and education that are contained in the six days commencing tomorrow. Every reader of the Standard is already acquainted with the programme.

Performances start at 1:30 p.m. and 8:30 p.m. respectively.

Julius Chautauqua is a new departure for the benefit of the young folks, and it takes place each afternoon, to narrow being the organizing day.

The U.P.A. executive urges their members to do everything possible for the support of the Chautauqua, which means that they should buy a season ticket before tomorrow noon at the latest, as the programme has to be made up at that time.

Let's all go.

W. L. MULLINGER, Secretary of the Chautauqua.

Strathmore Hospital

The good work done by the Strathmore Hospital will continue. Eight cases were treated during the month of May, two being maternity and six emergency.

In following letters we will publish the statement for the months of June and July. The statement for June is as follows:

Expenditures, May 1920	
J. G. Bell, coal	\$ 25.25
W. M. Marshall, drug supplies	7.19
A. J. Turner, groceries	16.00
Brand, groceries	13.00
Brand, household supplies	2.00
Strathmore Trading, groceries	12.75
Beach & Fox, groceries	3.50
Beach & McDonald, meats, etc.	12.60
Pioneer Meat Market, etc.	12.60
W. E. Brown, mattress	6.00
Hotel Supplies	9.40
Telephone	2.00
Post	25.00
See Williams Salary	75.00
See Winnie Brown	8.00
2 Hot Water Bottles	2.51
Laundry	8.75
Miscellaneous	8.75
Total	\$329.69

Income from patients fees \$289.00
Number of patient days 56
Maternity cases 2
Emergency cases 6
Total 6

W. E. BROWN, Sec-Treas.

Mrs. Harold Bayly to Speak Here

At Conference of Gleichen Constituency of Alberta Women's Institute

The following letter has been received by Mrs. H. B. Bayly, Convenor of Gleichen Constituency, Strathmore, Alta.

Dear Mrs. Bayly: In order to provide you with interesting speakers for your Constituency Conference it will be necessary that your Conference be held on August 23rd. In addition to the Provincial President, Mrs. W. H. Noble, we have been able to secure as a special speaker, Mrs. Harold Bayly of Birmingham, England. Mrs. Bayly in addition to being a British Journalist and a trade agent, is a splendid speaker and is in Canada to gather information of industrial conditions, especially in relation to women. Mrs. Bayly was in Canada and Japan some 15 years ago on the same mission and when she started for England she compiled a book on Alberta based on statistics and information obtained on this trip. This book was used officially by Alberta's department of publicity for immigration purposes before the war. Since the war there has been such a terrific upsurge of industrial conditions that Mrs. Bayly decided to come to America again. She spent at their recent conference in Chicago and also travelled to the west with the Canadian Manufacturers Association. She also addressed the Industrial Congress held in Edmonton in June.

Mrs. Bayly is particularly desirous of getting first hand information of every phase of women's life in Alberta and feels that through the Women's Institute she can be helped directly in touch with this—the Women's Institute being the largest women's organization in Alberta.

Mrs. Bayly's post name is "Mrs. Bayly" and she is known to many people in the community as a woman of many interests and of exceptional ability. She is now in Alberta.

Mrs. Bayly will be held in the St. Andrew's Church and all should take the opportunity of hearing Mrs. Bayly speak next week.

MARY McLELLAN, Secy.

The Women's Institute urged a pleasant afternoon July 21st, at the home of Mrs. John Taylor. The next meeting will be held at the home of Mrs. F. R. Lilly, Aug. 18th at 2 p.m.

Roll call after the name of your good Partner.

Discussion—Our Rural Schools. Come everyone, and bring your partner.

Prize List

Class I—Garden Products

NOTE: In section I, people compete only with other people from the same school. In all remaining sections, competition is open to the pupils of all schools otherwise eligible.

1. Collection of vegetables to equal weight of many kinds as are given from the seed distributed. The quantities should be as follows: 100 lbs. of carrots, 100 lbs. of turnips, 100 lbs. of rutabagas, 100 lbs. of cabbages, 100 lbs. of cauliflower.

Prizes: \$100, \$50, \$25, and 25¢ for each.

2. Best berry patches.

Prizes: \$25, \$12.50, \$10, \$5, and 25¢.

3. Collection of flowers of various descriptions, varieties to be shown in separate dishes.

Prizes: \$100, \$12.50, \$10, \$5, and 25¢.

Class II—Grain

Prizes must be three inches in diameter just before the blade.

Prizes for sections 4 to 12 inclusive: \$100, \$25, \$10, and 25¢.

1. Seed of wheat.

2. Seed of barley.

3. Seed of oats.

4. Seed of rye.

5. Seed of clover.

6. Seed of alfalfa.

7. Seed of timothy.

8. Seed of mixed grasses.

9. Championship prize for best seed.

Prizes: \$100, \$25, \$10, \$5, and 25¢.

10. Individual vegetable exhibit of 10 lbs. 1 lb. potatoes, 6 beets, 4 carrots, 4 parsnips, 2 turnips, 2 rutabagas.

Prizes: \$100, \$25, \$10, \$5, and 25¢.

Class III—Cooking

1. Ages 9 and under.

2. Food cakes without leaven.

3. Fruit cake.

4. Ages 10, 11, and 12.

5. 8½" baking powder biscuits.

6. Chocolate Mince-meat.

7. Fruit pie.

8. Fruit pie (double crust).

9. Rural School Lunch.

10. Class IV—Baking (Aged 10 and under)

1. Chocolate mix.

2. Biscuits.

3. Slip over slip.

4. Patching on cotton.

5. Collection of fancy work.

6. Table runner.

7. Short essay (about 50 words) on one of the following subjects:

(a) Laundry of women made.

(b) Methods of cleaning mail.

HON. C. H. POOLE, member of the New Zealand parliament, coming to Strathmore.

Wheat Cutting In Two Weeks

Crop Prospects Excellent

Excellent ripening and growing weather has prevailed during the past week, and crops continue to show every promise of an excellent harvest.

There has been no rain since that reported in last issue, but there is an abundance of moisture in the soil, and though in some cases an occasional shower would make the berry plumper, yet the crop can carry through to a big yield without any further moisture.

Wheat in most cases is fully headed out, and two weeks more of good weather will see the commencement of the harvest.

A big hay crop is being harvested all over the district at present, the amount taken off per acre having in some cases been more than was anticipated from the appearance of the field. Winter rye has also been cut for hay in some cases, but most of it is fully ripe, and is being cut now for silage. This considerable amount of hay in crop throughout the district.

The damage through hail and other causes throughout the district has been insignificant up till now, much less than any former year up till this time. It is to be hoped that the hay will keep up its good reputation till the crop is all harvested.

Throughout the whole of the Bow Valley district, from London eastward to Calgary, and from the Bow River north to the Baseline, the crops are better than they have been any year since 1915, and though a lot of crop was put in in stubble, owing to the early setting in of winter and its late termination, yet it promises a good yield.

Though this is an irrigated district, very little water has been used, the rain having been evenly distributed and abundant throughout the whole season. The points which the area of the Western Irrigation Block where water was used this year extended distance west to near Crossfield, where the June rainfall was not so heavy as in the district surrounding Strathmore, Crossfield, Didsdale, Crossfield, Nightingale, Nankana and Ardena districts show uniformly good crops.

The farmers are making every preparation for a big harvest and the number of binders sold by local dealers will be over three figures. A large number of threshing outfits are also expected sold.

The labor problem is causing some anxiety, as farm help even at the present time is scarce, but it is to be hoped that the Government labor bureau will be able to meet the demand. Big wages are being demanded by prospective harvest workers.

(c) Ideas for furnishing and cleaning a living room.

Class VI—Arts and Manual Arts (Pupils 10 and under)

1. Drawing of still life.

2. Representation of landscape in colors.

3. Surface pattern in colors. Using silk printing, cut paper or crayon.

(Pupils 10 or over)

4. Drawing of still life, animal or figure from pose.

5. Sewed blanket with cover design.

6. Basket made from native material.

7. Piece of wood work, plain stain or varnished.

Class VII—Penmanship

8. Specimen of penmanship (50 to 100 words).

Class VIII—Map Drawing (Pupils 10 or over)

9. Map of Alberta, showing centers of population and railways, nature of products, relief and drainage.

10. Map of North America showing countries, principle cities, relief and drainage.

Class IX—Live Stock

All stock exhibits must have been born in 1920. Prizes \$25, \$15, \$10, \$5, and 25¢.

(Continued on inside page)

Phonograph Competition Standing

The competition for the Phonographs donated by the Royal Dux Store and the Strathmore Standard for the young boy candidate polling the greatest number of votes closes on Saturday, August 14th when the ballot box will be opened for the last time and the votes counted.

The interest in the competition since unstarted, and the contestants will strain every effort to collect votes until the last hour of the competition. All votes have to be in the ballot box by six p.m. on August 14th.

The premiums offered in the competition are well worth every candidate's careful making a supreme effort to win. The first prize is a Starr Phonograph valued at \$225, with \$25 worth of records. The second and further prizes are due bills towards the purchase of a similar phonograph, details having been given in our earlier issues. In addition the possessor of the first prize winner gets a handsome gold watch and various other prizes have already been distributed to various candidates.

The Phonographs are on exhibition at the store, W. M. Marshall's store, and they are the highest development in their line in the way of beauty, tone and mechanism. Votes are gained by subscriptions to a standard and by response given for purchases at the Royal Dux Store.

Following is the standing of the candidates on Monday's ballot. There will be a lot of guess work as to who is the successful candidate, and there will be some big surprises probably when the last count is taken.

Edith Martin	28881
John Gantner	27681
Ruth Siss	19276
Grace Anderson	45277
John Deiger	51577
Frederick Schaeffer	56811
David Dobson	56539
Alice Way	21241
Stark Miller	13943
Isabel Sewall	19275
Helen Miller	7019

Mercer Put On Probation

James W. Mercer, who has been located in and around Strathmore district since his return from overseas, where he was sergeant with the Army Medical Corps, and who recently appeared at a drug store at Standard, Alberta, was placed on suspended sentence by Magistrate Davidson on Friday, for a crime committed in 1916, to which he pleaded guilty. Sentence was suspended with the understanding that Mercer would pay the fine of which he had defrauded D. E. Black & Co. at the rate of \$25 per month.

Several other accounts which Mercer had contracted against Strathmore recently were paid up prior to the opening of the trial.

According to the story told the police, Mercer came to this part of the country in 1915. In 1916 he came to the attention of the public when he appeared as a naturalist and went to several schools in the province as a lecturer on nature study, and it is alleged, represented himself as a western agent of the Canadian Independent Naturalist Association.

Ordered Barges to Charge

It is accused of having ordered 20, 000 barge barges, valued at \$1,620 and 4,000 shipyard barge barges, valued at \$1,200, from the Illinois jewelry store, with the understanding that \$1,200 was to be paid on the final acceptance of the barge barges. The case is now on the completion of the delivery of the order. The order was left on the jewellers hands.

Boy Drowned

On July 23rd, Fred Werner, 12, while swimming in a pond on the Midland ranch on the Bow River, apparently took trouble and before he could be rescued was drowned.

Mr. Werner was 12 years of age, and for a number of years past had been residing with his family on their farm north of town. He leaves a mother and father, two brothers and three sisters to mourn his loss.

The funeral was held on July 26th at 2 p.m. and interment took place in the cemetery of the Seventh Day Adventist Church.

Boy Drowned

Investigation through Ottawa have been made, but no such organization as the Independent Naturalist Association, according to the police, and the police say that correspondence carried on by Mercer and found in his possession was all a fake.

The public stenographer at the Palliser Hotel was used by Mercer for all his letters and the police have received a report from this department that more than \$200 in costs. Mercer never having paid anything for the work given out.

THE CELEBRATED FISK JUBILEE SINGERS The Last Day of the Chautauqua.

BOY SCOUT NEWS

Young Canada—
"Be Prepared"Letters to A
Patrol Leader

From the Book by the Hon. Roland E. Phillips—Scout Law
Number Three

A Scout's Duty is to be Useful and Help Others.

My Dear Scout,
I was yarning to the chaps the other night, at a parade, about Scouting. They were a splendid crew of about 40 boys, all of whom were eager to join.

I told them of a particularly gallant attempt where a woman fell over the edge of a pier just as a big liner was coming alongside, and a boy of eleven dived down into the water and got her out of the way. Just in time to avoid being crushed.

I told them of the crowd of people, strong men, many of them, who were standing on the side wharf, but doing nothing to help, and asked them why this boy had been the one to make the first dive into the water.

They gave the same answer as before.

"Because it was his duty, Sir."

The answer that these boys gave me showed that they had already learned a good deal about Scouting in a better way than by hearing a Commissioner yarning to them.

They had learnt it by reading some of the genuine deeds and heroic actions performed by Boy Scouts all over the world, and they had learnt it by their personal acquaintance with the Scouts in their own neighborhood, who in spite of constant failure were continually trying to do their duty in the sphere of everyday life.

You will soon see meeting your patrol to speak to them on the first Scout Law, the Law of Duty.

Duty is not the same for everybody. Some people have one duty to perform, and some another. It may be one man's duty to emigrate to Canada, while it is another man's duty to look after his mother in England.

It may be one man's duty to work as hard as he can for eight or nine hours a day while it is another man's duty to be a good father and a good husband.

It might be another man's duty to take a month's holiday for the sake of his health. But the duty of every Boy Scout is the same.

"A Scout's Duty is to be Useful and Help Others."

It is easy to talk about being useful but it is hard to do these things in actual everyday life.

It is not so difficult, however, for the Scouts have a way of reminding themselves to keep the first Scout Law.

The way is by tying a knot every morning in the corner of their handkerchief—if they are without a handkerchief, an old handkerchief will do equally well—and by not untying that knot until some definite Good Turn has been performed.

I know that you yourself have been carrying out this practice regularly ever since you joined, and the fact that your Scoutmaster is doing just the same must give a good deal of encouragement to the boys.

You told me the other day that sometimes you found it a little difficult to get your Good Turn done until quite late in the evening, and once you failed altogether, and so had to

do two special Good Turns on the next day.

Some people who have never tied knots in their handkerchiefs except to remind themselves to have two helpings of pudding for dinner will laugh at Scouts, and tell them that a person with a kind heart does a great deal more than one good action every day.

If anyone tells you that, you must ask them to tie a knot for a week and tell them to get it undone.

The Scout's Good Turn does not mean some kindness that one would do in any case, but it means something that one has gone out of one's way to do to help other people.

Sometimes a Good Turn may consist in removing a piece of banana peel from the sidewalk or a bit of broken glass from the road. Sometimes it may consist in rescuing somebody from a burning house or in pulling a child out of a rushing stream.

It does not matter whether the Good Turn is a big one or a small one, whether it takes a long time or whether it takes a short time, whether it is difficult or whether it is easy.

The only thing that matters is that the Scout is moved by a spirit of sacrifice and of service, and that he goes about the world more gladly because he knows that a Scout's Duty is to be Useful and to Help Others.

Your sincere Brother Scout,
Roland E. Phillips

World's Food Supply

Sir Auckland Geddes Says Acreage of Wheat Needs to be Increased

No less an authority than Sir Auckland Geddes, British ambassador to Washington, has added the weight of his name to the food supply in one of the gravest problems of the day, especially for the European nations. He considers that the strongest influence which controlled Germany to declare war was the realization that her population was increasing faster than was the means of producing food and clothing. The trend of prices had been upward from the beginning of the century, so that even if he had taken the world's food supply into consideration the demand would have been intensified.

Sir Auckland did not speak as a scientist, his only object being to make clear how the shortage affects Canada and the United States.

In a new country such as this, where the majority of the people are on the land it has been difficult to realize that bread might one day be lacking, for if the crops failed in one part the wheat would be supplied in another province where the harvest was more abundant. Even in the United States, however, the wheat was regarded as something abnormal that would soon pass away. According to figures presented in an article in the past, there is still enough wheat to feed the world, though lack of funds and difficulties of transportation are making it difficult to get to go short. There is not likely to be starvation for many years to come. It will need a great deal of equipment and a great deal of money to keep pace with the requirements of coming years. Canadian farmers are not doing as well as they should be doing, and the average without fear of a glutted market, unprofitable prices—Montreal Family Herald.

China is Awakening

Leaders Are Men Who Have Been Trained Abroad

Predicting the great awakening of China and the tremendous industrial advancement of that country, Dr. Tshai Hsieh, Chinese high commissioner of labor, and trade expert to Canada and the United States, arrived in Ottawa on his trans-Canada inspection tour. Dr. Hsieh, who is extremely energetic and ambitious, and who has been a student of the Chinese institutions, argues that the people of this country insist that they have taken with him Canadian goods so that Canada and her vast possibilities will be doubly improved on the Chinese people.

"Every Chinese trained abroad in western lands to take the lead in the new expansion of trade," he said, "and the handling of labor problems," he said, "when emphasizing that the status of the Chinese people must be increased."

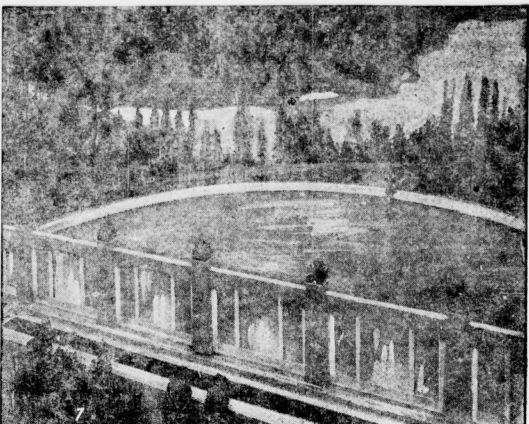

"Chinese students in the many areas of learning in Canada and the United States are the potential leaders of China tomorrow."

A Complete Loss

She—A man never loses yours. Here are all your parents that you gave me.

He—That's all very fine. But what happens you found it a little difficult to get your Good Turn done until quite late in the evening, and once you failed altogether, and so had to

The Murdock
Disclosures

Charges Cabinet With Hampering Work of the Board of Commerce

The recent resignation of James Murdock, labor commissioner on the board of commerce, has been the subject of considerable comment, and the publication of Mr. Murdock's reasons for severing his connection with the board affords a great deal of enlightenment. In the course of a lengthy letter he has explained very clearly why it became impossible for him to continue to act. The following excerpts from Mr. Murdock's letter to the Premier are particularly interesting:

"That the majority of the cabinet, of which you are the honored leader, are not and never have been in sympathy with the provisions and intent of the Board of Commerce and of the Combines and Fair Prices act."

"That your advisers only recommended to parliament the passage of these acts as the result of temporary accident to the Winnipeg strike and other strenuous demonstrations during which the people demanded some means of controlling producers."

"That as soon as the Board of Commerce act and the Combines and Fair Prices act were made law by the parliament of Canada honorable gentlemen prominent in the councils of Canada and members of your cabinet at once began to undertake to minimize to as great an extent as possible, what they believed to be the unnecessary and unfair provisions of these two acts when applied in the business cases of those for whom these honorable gentlemen had first agreed."

"That the chairman appointed by your government to the Board of Commerce was regarded by certain interests as being safe and sane in endeavoring to cause manufacturers and other large financial and business interests the generally unrestricted license heretofore enjoyed by such interests in the taking of profits, determined alone by the so-called market price and governed by supply and demand, and that he was in full sympathy with high prices and against low prices, as he states in his letter to Sir George Foster of February 23rd."

"That during the 145 days that I was associated with the chairman as a member of this board he spent most of his time in Winnipeg or en route to or returning from Winnipeg in looking after his private affairs but he did in looking after Board of Commerce matters, and that even during the few days, December 8 to 12, which the entire board spent in Winnipeg, he was engaged in his private affairs while the remainder of the board held hearings of the court alone."

"The board has discovered that unfair and excessive profits are being taken by certain textile manufacturers, certain oil companies and other large concerns. It is in the public interest that these investigations thus begun be not stopped at this point, but continued by a properly qualified Board of Commerce."

"There is reason to believe that sugar, and only sugar, is the commodity which speculation to the detriment of the consumer has taken place. With a proper staff a board of commerce can undertake to check or largely reduce speculation in necessities of life."

"Without a Board of Commerce the public has no organization to watch and protect its interests, while on the other side there is the most complete organization and cross-organization of manufacturers' associations, wholesale associations, retail associations, packers' associations, and hundreds of other associations. The public, unorganized, is at a disadvantage and requires a protector against the superorganization of modern business."

"In conclusion, I suggest that I continue as a commissioner of the Board of Commerce until the decision of the privy council, and that the present act be amended to enable me to continue until the decision of the privy council. I believe your cabinet means to prevent the Board of Commerce from functioning even should the privy council give a favorable decision. My commission shall be to permit me to become a high-salaried time-server."

"New Theatre to Be Built
A new theatre, costing at \$125,000 is to be built at Edmonton, Alberta under the direction of Trans-Canada Theatre, Ltd., a corporation owning and operating a chain of theatres from coast to coast. According to the contract for the erection, the building is to be completed by February 1st next. It will seat 1,500 people, will have an ample stage and will be fully up-to-date in every respect."

"U. S. Without Oil in 18 Years
According to the latest statistics, the U.S. is consuming its oil supply fourteen times as fast as the rest of the world. The latest figures on the world's oil supply, the geological surveys report, disclose that the foreign countries are using only one-half as much petroleum as the United States, while they have seven times as much oil in the ground. "The foreign countries," says the report, "are now using about 200 million barrels of oil yearly, but they have resources large enough to last over 250 years at this rate of consumption. In striking contrast are the production figures for the United States which at the present rate of more than 400 million barrels a year has only an 18-year supply. In other words the United States is using up its own oil supply fourteen times as fast as the rest of the world."

"Green Banana Legislation
To prevent the shipment of immature bananas to the United States and Great Britain, the Jamaican government has initiated legislation making such shipments an offense punishable by a heavy fine."

"Payment of Indemnity
Allies Agree on Plan Submitted by Financial Experts
The plan for the payment of the German indemnity to the Allies agreed on by the British and French financial experts is as follows:
The indemnity will be fixed at a total sum between one hundred and one hundred and twenty billion marks in gold.
It is to be paid in 37 annuities.
The payment in no year shall be less than three million marks in gold.
The amount to be paid in any one year may be increased above three billion marks if Germany shall recover her property in a manner to be able to pay more.
Factors in determining this ability to pay will be fixed by indices making the increase automatic and not the subject of debate or adjudication.
It is upon the prospect of these annuities that the Allies propose to issue international bonds through the reparations commission. These bonds will be issued on a plan which will give Germany about one-third of the cost of public interest used.
In this way there would be established a community of interests between Germany and the Allies. Inasmuch as this plan of payment constitutes an addition to the financial provisions of the Versailles Treaty, it needs the consent of Germany. It will be placed before Germany either in a note or at the Spa conference, most probably in a note with a request for reply at Spa. The matter of the issuance of the international bonds will be considered after the Spa meeting."

The matter of the issuance of the international bonds will be considered after the Spa meeting."

"U. S. Without Oil in 18 Years
According to the latest statistics, the U.S. is consuming its oil supply fourteen times as fast as the rest of the world. The latest figures on the world's oil supply, the geological surveys report, disclose that the foreign countries are using only one-half as much petroleum as the United States, while they have seven times as much oil in the ground. "The foreign countries," says the report, "are now using about 200 million barrels of oil yearly, but they have resources large enough to last over 250 years at this rate of consumption. In striking contrast are the production figures for the United States which at the present rate of more than 400 million barrels a year has only an 18-year supply. In other words the United States is using up its own oil supply fourteen times as fast as the rest of the world."

"Green Banana Legislation
To prevent the shipment of immature bananas to the United States and Great Britain, the Jamaican government has initiated legislation making such shipments an offense punishable by a heavy fine."

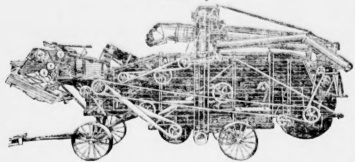

"Payment of Indemnity
Allies Agree on Plan Submitted by Financial Experts
The plan for the payment of the German indemnity to the Allies agreed on by the British and French financial experts is as follows:
The indemnity will be fixed at a total sum between one hundred and one hundred and twenty billion marks in gold.
It is to be paid in 37 annuities.
The payment in no year shall be less than three million marks in gold.
The amount to be paid in any one year may be increased above three billion marks if Germany shall recover her property in a manner to be able to pay more.
Factors in determining this ability to pay will be fixed by indices making the increase automatic and not the subject of debate or adjudication.
It is upon the prospect of these annuities that the Allies propose to issue international bonds through the reparations commission. These bonds will be issued on a plan which will give Germany about one-third of the cost of public interest used.
In this way there would be established a community of interests between Germany and the Allies. Inasmuch as this plan of payment constitutes an addition to the financial provisions of the Versailles Treaty, it needs the consent of Germany. It will be placed before Germany either in a note or at the Spa conference, most probably in a note with a request for reply at Spa. The matter of the issuance of the international bonds will be considered after the Spa meeting."

**Steel is Vital in Motor
Cars**

—o—

Too people realize the important part steel plays in modern automobile manufacturing," says Harold Bell, local dealer in Chevrolet passenger and commercial cars.

"Steel forms the backbone of each automobile as well as the mainstay of its vital parts. It enters into the construction of the frame, axles, shafts, motor and other units which are subject to the severest strains.

"To obtain the quality of the steel used in these parts, important things depend. It is responsible in great measure for strength and long wearing qualities. The safety and comfort of passengers depend upon it. The medium weight design that makes the up-to-date car so economical to operate, is based on the strength of the highest grade steel.

"Steel is made from wrought iron by the use of carbon. The amount of carbon used determines toughness, brittleness and strength.

"Other substances such as manganese, chrome, nickel and tungsten give the steel special characteristics for different uses. When these are added their properties are developed by heat treatment.

"In modern automobile factories where quality production warrants the use of the latest equipment, every facility is employed to insure just the right quality in the steel used.

"Only the best steel obtainable is bought. Scientific tests are used, and special laboratories are maintained where a complete staff of metallurgical and chemical experts keep constant watch over every phase of the steel's development."

Rockyford Sports

—o—

As the weather man saw fit to turn on the juice on the morning of the 22nd, Rockyford enjoyed the unlabeled for pleasure of having two sportsdays. The heavy showers of the 21st had rendered the diamond unfit for play and as the outlook at 9 a.m. on the 22nd was not promising, the committee were reluctantly compelled to postpone the events until Monday. A change has it, the afternoon turned out fair, but the crowd who came were amused by an excellent wrestling match between Vic Cook of Chicago and Ed Tucker of Rockyford, in which the Chicago boy finally came out on top. A scratch baseball game was played in the mud, but the editor has been unable to discover who won a dance in the evening completed the day's amusements.

Monday brought a real July day and a good crowd. The McGill acrobats were early in evidence, and did a rushing business all day. The stunt flight took away the breath of many of their fair spectators, and we understand that they are taking up a collection to buy the intrepid Alex Sanger a "Legion of Honour"—cigar—in commemoration of his partnership in the event.

The athletic events were pulled out as scheduled, the winners being given below:

Free for All Horse Race

1. Beauty—Otto.

2. Daisy—Brenet.

Ladies Horse Race

1. Shorty—Hedstrom.

2. Beauty—Otto.

Boys Pony Race

1. Shorty—Hedstrom.

2. Luck—Morgan.

Cowboy Race

1. L. Ingell.

2. McMan.

Cowgirl Race

1. Esther Hedstrom, 25 seconds.

2. Hilda Hedstrom, 36 seconds.

3. Agnes Hedstrom, 40 seconds.

Wrestling

Vic Cook, the Keoma Champion

threw Vic Curry in three minutes and four minutes.

The dance in the evening was a

huge success and thousands of dance

music had a treat from Myers Dick-

tra.

Taking everything into consideration

on the sports passed off better than

was expected, and the committee beg

to tender their thanks to all who help

ed render it a success. Especial thanks

were voted to the ladies who begged.

The dinner put on in the village hall

by the Catholic women of the parish

was without doubt a great success,

and was certainly a credit to the women

of the vicinity. The meal was ex-

cellent, likewise the service.

The total sum realized from dinner,

supper and lunch at the dance was

\$250.75, all of which was donated with

the exception of \$12.50 for board. This

leaves a net profit of \$258.25 over and

above all expenses. This money has

been deposited in the Bank and will

be used in due course for purchasing

of necessities for the church.

—o—

Dr. Blackburn was in Rockyford for

the sports on the 26th.

—o—

The crops around Rockyford were

greatly benefited by a heavy shower

on the evening of the 21st when we

had about three inches of rainfall.

Mr. Mannix, of Calgary, was in the

district last week inspecting his farm

south of town. He is quite satisfied

with crop prospects around Rockyford.

RUMELY IDEAL

Keeping the Straw on the Move

WHEN we designed the Rumely Ideal threshing machine we knew "where we were going." We knew that the biggest trouble in threshing always has been bunching, winding of the cylinder, choking up. We knew that anything that impedes the flow of straw prevents perfect threshing.

So we designed the Ideal on the principle of a steady even flow of straw through the machine—from the time it enters at the cylinder until, free of all the grain, it leaves the machine through the stacker.

Follow the straw through an Ideal. Notice the size and weight of the cylinder and the relative position of the grate—that in the Ideal the grates are not placed half way up around the cylinder but right behind and beneath where they allow the cylinder to relieve itself of the straw at the most natural point—the bottom—before the cylinder starts on its upward turn.

Then see how that patented Ideal traveling rake works—taking the straw from the cylinder and delivering it to the straw rack in that same steady even flow—all the while separating the grain from the straw because the rake is slatted.

You'll find the Ideal straw rack different from others—instead of relying upon shaking alone there are sets of lifting fingers that tear the straw open—rake it—beat it from beneath.

And to guarantee perfect cleaning there is a chaffer in the cleaning shoe as well as in the grain pan—no overloaded shoe and a cleaning system that not only delivers clean grain but takes care of the big capacity for which every Ideal is noted.

We have a catalog for you that tells everything about the Ideal, which is built in five sizes, 22 x 30, 28 x 44, 28 x 48, 32 x 52 and 36 x 60.

ELECTRICITY ON THE FARM

Make your home brighter and more cheerful with electric lights—more comfortable with electric fans—more convenient with the many labor-saving devices that electric current will make available for your use.

Do away with the smelly, smoky, greasy oil lamps that have to be filled and trimmed daily and then furnish only dim, unsatisfactory light. Protect your home from the fire risk.

THROTTLING GOVERNOR "Z" ENGINE

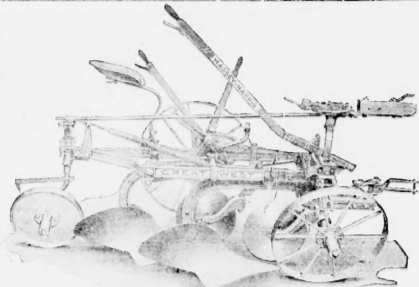

The "F" Light Plant is a low-speed, horizontal, water-cooled engine mill—simple—long lived—with every part readily accessible. It is easy to operate, self-starting—requires no mechanical knowledge or experience—gives you electric light and power too, wherever and whenever you want it.

The engine used in "F" plants is the Fairbanks-Morse "Z". It has more than rated power and more power than needed to charge the storage batteries—you can charge your batteries while it is doing other farm work.

POWER FOR OTHER FARM NEEDS

You can use the engine to drive a separator, grinder, churn, or other machines, independent of the dynamo, either direct or through a line shaft. Thus you need not buy motors—although you can use your electric current for such power, if you wish. The "F" is a general utility plant. And remember, the successful operation of this combined plant is assured by the time proven responsibility of one large manufacturer—guaranteed by the well-known Fairbanks-Morse Quality.

Call in and see Demonstrator.

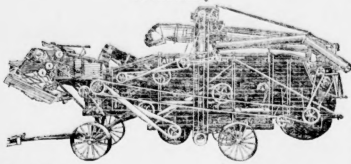

If you are looking for a plow that can be depended upon, under the most difficult conditions, a plow that the most critical and exacting farmers choose, one that will give good service for many, many years, strongly built and built with the very best of materials, then the Massey-Harris Plows will interest you. I can quote you prices, which, when Quality, Dependability and Service are considered, you will find attractive. I can equip you with the Right Plow, whether you walk, ride, use a Tractor or Steam Engine.

The greatest authorities on Soil Culture tell us it is absolutely necessary to put back into the land—Nitrogen—Potash—Phosphorus. All these are found in Barnyard Manures. The Easiest and Simplest way to put same on to the land is with the Massey-Harris, Low Down, Wide Spread, Reliable and Durable Manure Spreader.

The machine that increases the farmer's profits. Every part of its construction reflects the master-builders skill. See me for a demonstration of this wonderful machine. Measures 15 1/2 ft. wide but spreads 7 ft. wide. The greatest time and labor saving implement on any farm.

 7. Remittances should be made by marked cheque, money order or postal note.
- Write for fuller information to Deputy Provincial Treasurer.
- These Bonds may also be obtained from any recognised Bond House in the Province of Alberta.

Address all communications to DEPUTY PROVINCIAL TREASURER

HON. C. R. MITCHELL,
Provincial Treasurer.

W. V. NEWSON,
Deputy Provincial Treasurer,
Parliament Buildings, Edmonton, Alta.

Encourage Dairy Industry

Will Sell Pure Bred Stock on Easy Payments

To encourage the development of the dairy industry the Saskatchewan Government has sent A. J. Clark, of the stock branch, to the coast to sell one hundred head of young grade dairy cows and heifers.

An effort will be made to secure as many Shorthorns of a good milking strain as possible and the rest will be grade Holsteins and Ayrshires.

These cows will be sold on easy terms to farmers already engaged in dairy business or who are entering it, who will agree to have all cows purchased from the department bred to pure bred sires of the same standard strain.

Nine men constitute a jury in Mexico, and a majority gives the verdict. The jury is unanimous there is no appeal.

Faint and Dizzy Spells, Weakness and Shortness of Breath.

You can generally tell when the heart is affected by the faint and dizzy spells, the shortness of breath, palpitation, throbbing, irregular beating, annoying sensations, sleep, and a general feeling of choking sensation.

Many men and women become rundown and worn out when other people they could be healthy and happy. If they would only pay some attention to the first sign of heart weakness.

So remedy will do so much make the heart regain strength and control, regulate its beat and restore it to a healthy and normal condition. The Milburn's Heart and Nerve Pills. Mrs. C. A. S. Drake, Park, Ont., writes: "I have used you towards the second box of Milburn's Heart and Nerve Pills and find they have done me good. I had then a very bad attack, is one in a while, and also weak nerves and shortness of breath, and would become so choked up at times I could hardly sleep without sitting up in bed. When walking too fast I would have to stop and try to catch my breath. I feel a lot better now. I have used your pills and know that they have helped me wonderfully as I have improved very much. I have a box at all doctors or pulled direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont."

In Burma people of superior rank must not disfigure themselves by passing underneath persons of inferior rank. Thus a nobleman must not pass through a hall when a servant is present in a chamber or hall. The one of the chief reasons why most of the houses in Burma are but one story.

The barn owl, when she has young, brings a mouse to her nest about every 12 minutes. As she is actively employed at both evening and dawn, and as both male and female hunt, 40 mice a day is a low computation for the total capture.

In Japanese cities many of the streets are devoted exclusively to the sale of particular articles.

Alien Immigration On the Increase

No Shortage of Foreign Labor in U. S. Anticipated

The present immigration situation portends no curtailment of the supply of foreign labor in the United States, Frederick A. Walls, commissioner of immigration at Ellis Island, commented in making public statistics for the fiscal year just ended.

Though total departures were 334,284, or 19,736 in excess of arrivals, he declared that the increasing tide of alien steadily is increasing. He pointed out that the immigration of alien stevedores and sailors on a year basis until last March, and that most of the outgoing aliens are bringing their families back when they return.

Immigrants are arriving as fast as they can obtain transportation, Mr. Walls said.

At Yoho Camp

Beautiful Resort in the Yoho Valley Opened to the Public

On July 1st Yoho Camp was opened to the public. This camp will have accommodation for at least 25 people and will be located on the banks of the Yoho River, about a mile and a half from the foot of the Takakaw Falls. It consists of about ten small tents (for sleeping purposes) and each tent will accommodate from three to four persons comfortably.

The rates will be on a basis of five dollars per day, two dollar per tent and one dollar for each tent.

The camp will be situated about 11 miles from the town of Yoho, on the road to the foot of the Takakaw Falls. It consists of about ten small tents (for sleeping purposes) and each tent will accommodate from three to four persons comfortably.

As an alternative this trip can be made by carriage to Emerald Lake, which is about 10 miles from the camp. The trip is a beautiful one, and the scenery is of the highest quality. The trip is a beautiful one, and the scenery is of the highest quality.

Many interesting and charming trips can easily be made from Yoho Camp to Emerald Lake, Yoho Glacier, Takakaw Falls and Burgess Pass. The trip is a beautiful one, and the scenery is of the highest quality.

The trip to the coast is not complete unless a trip is made to some of the beautiful resorts and view the interior scenery at leisure. Canadian Pacific agents will give full information and descriptive booklets on the scenic resorts.

National Industrial Meet

Will Follow Up On the Conference Held Last Year

Plans are being made for the calling of another national industrial conference, at which both capital and labor will be in attendance. The appointment for this purpose was provided by parliament in the Department of Labor estimates which passed during the last week of the recent session.

The conference held last year, it is felt, was productive of good results in bringing capital and labor together and ironing out many incipient differences. This year it is hoped to continue the good influence started last September.

It is not likely that the conference this year will take place before September or October, but the probable dates are expected to be announced in the near future.

"Corner" in Storms

The Island of Java owns up to an average of 97 storms a year, or approximately two a week, the world's record.

Southern islands beside Java with 86 per annum. Borneo and the Gold coast, have 50 each, Rio de Janeiro, 31 July, 80 Buenos Ayres, Canada and Austria, 23. France and South Russia, the colder regions, have 16 apiece, Spain and Portugal 15, Sweden and Finland eight. East Java can get off very lightly with a total of none—none!

Apart from the human species, no land animal can sleep.

Another Case of Blood Poisoning

Perished in perils his corns with a razor. Foulness when cure is possible comes with Putnam's Corn Extractor. Use Putnam's only—it will get you out of trouble and painless price 25c. at all dealers.

Ice Mines

Walls are Encrusted in the Hottest Months of Summer

A miner, prospecting for lead, many years ago, blew a shaft into a rocky hillside at Birkby's Park, near Eglar water. The mine was abandoned, but the following year its walls, and the cavern leading from it, were discovered (interest with ice) and this has been reopening annually, and strangely enough, in the hottest part of summer.

Nature's chemistry, to explain this phenomenon, claims that owing to the peculiar formation of the cavern the cold air of winter does not penetrate and is held in until well into the spring. At that time the water from the spring thaws is seeping its way through, and meeting this cold air, freezes. It comes from France (it claims). In July and August pipe parties were seen freezing ice cream at the mouth of the ice mine. They have been chopped from its walls. There is said to be a larger ice cave in the cliffs at Delorah, where windings passages lead for miles into the hills, and that there is evidence that the Indians had discovered this in the old days and used them as storage places for their food in summer.

Vancover Produces Tons of Strawberries

Holds Highest Record for Production Per Acre in Canada

More than 400 tons of strawberries were harvested in a single district of British Columbia, during the season 1919, and they sold for over \$12,750, at an average price of \$35 per ton.

Under careful cultivation strawberries are producing from \$100 to \$200 gross per acre, and the total space devoted to last season's crop was about 400 acres. This district holds the highest record for production per acre in Canada.

Last year's production represents a new title of what the island is expected to produce this season, for this inclusive fruit thrives in many parts of the island and the market for strawberries is larger than for any other fruit.

Canisters from Western Canada contain for strawberry pulp. Jam factories, and fresh strawberries are suitable for shipment and the fresh fruit for table use there is always a demand greater than the supply.

With a climate somewhat in the degree that at times approximates the temperate by the Japanese current, this region is destined to become one of the greatest producers of the continent.

Should Eliminate Non-Laying Hen

Makes More Room and Keeps Feed Bills Down

The reason of the year is at hand when poultrymen should be considering the advisability of eliminating non-laying hens from the flock. Eliminating the non-laying hen has a tendency to keep the egg production at a high level, which means more food for the birds that are laying during the hot weather and besides this it helps to keep the feed bills down. Early culling is a good practice. Poultrymen are paid to keep the flock from five to ten percent of the birds in the flock are not laying at the close of the year and could advantageously be eliminated. It does not follow that all broody hens should be taken out for many of them will start laying again as soon as they broody period is broken up. On the other hand, birds that are moulting at this season will, as a rule, be found unproductive. It is a best to give the hen the benefit of the doubt and no hen should be convicted until all the evidence has been examined. It is perhaps best to examine the shanks, beak, carotides (in the light breeds), and the vent to determine whether they are pale or red in color. Yellow in these parts denotes hens that are moulting and will help when used properly to eliminate the non-laying hen.

Miner's Liniment Relieves Diphtheria

Although amuletism saves 403 legions from death, the frigate-bird is said to return every night to its solitary roost.

HOW TO OVERCOME NERVOUS TROUBLES

A Returned Soldier Tells How He Regained Health and Strength

Nervous troubles of all kinds, paralyzing, debility, and all the other troubles that are the result of the war, are the result of the war. The change is both physical and mental. The sufferer loses weight and strength, and frequently becomes ill and feeble. Nervous troubles that were once thrown off by the sufferer, and which are the result of the war, are the result of the war. The change is both physical and mental. The sufferer loses weight and strength, and frequently becomes ill and feeble. Nervous troubles that were once thrown off by the sufferer, and which are the result of the war, are the result of the war.

Kept Kipling's Checks

Author's Balance in Bank Did Not

At one time Kipling paid his bills, no matter how small they happened to be with checks. After awhile he discovered, to his amazement, that his bank account showed a large balance. He was surprised to find that his checks were not cashed. He was surprised to find that his checks were not cashed. He was surprised to find that his checks were not cashed.

Minard's Liniment Relieves Colds, etc.

Produced Minerals at \$254,001,586

Minerals to the value of \$254,001,586 have been produced since the discovery of silver at Colaba in 1903, and the finding of gold in the Porcupine and Kirkland Lake districts about six years later, according to returns made on official figures. Dividends paid by the mining companies have aggregated \$99,623,331.

What For?

Just why America should be levered into building huge battleships and battleships at a rate that will soon make us the strongest naval power on earth is a question that is interesting Great Britain, Japan, and some people in our own land. The launchings of the "Olympic" class, the world's largest battleship, has renewed to us this matter—Literary Digest.

Masonic Picnic at Bow
River

Brethren of the square and compasses and the keystone passed from labor to retirement last Wednesday afternoon, when the members of Strathmore Lodge A.P. & A.M., and Strathmore Chapter R.A.M. picked up their wives, families and help friends on a pretty spot just south of the Bow River from the main bridge.

Nearly every Mason in the district was present. As a starter the picnic was regarded with interest and watermelon, which had come down on a motor track. Following that an exciting baseball game was played between the Blues and the Reds, the Reds winning out by 10-2. W. C. Brown manipulated the curves for the brethren of the Blue Lodge and L.H. O. Lomhold handled the pill for the Chapter members. Some solid and wonderful plays were witnessed.

The picnic proper commenced about 4 o'clock, when everybody had a basket opened it was there was an abundance of cakes, tea, for all.

Another ball game between married and single was brought to a close by the falling of the shades of evening.

Strathmore Lodge, No. 7, I. O. F., 28-30 Thursday in August and then regularly every Thursday after September 1st.

Lodge Hall above W. C. Brown's Furniture Store, is for use for meetings, etc. Apply W. M. Marshall, T. Philips.

BUY AN IRRIGATED FARM

FROM THE CANADIAN PACIFIC RAILWAY

BECAUSE

irrigation makes the farmer independent of rainfall, and insures good crops, not occasionally, but every year.

irrigation makes possible the successful culture of alfalfa, the king of forage, which insures good returns in dairying and stock raising.

irrigation means intensive farming and close settlement with all the advantages of a densely populated agricultural community.

irrigation in the Canadian Pacific Railway Irrigation Block is no longer an experiment, the fact that it has been tried having absolutely demonstrated its success wherever intelligently applied.

You can buy irrigated land from the Canadian Pacific Railway at prices averaging \$50 per acre, with twenty years to pay and the privilege of a loan of \$2,000 for improvements (5% interest) no principal after first payment until end of fourth year, reduced interest if settlement conditions are complied with and no water rental for first year. Contract can be paid off before maturity if desired.

This is the most liberal offer of irrigated farm in Canada on record. For full particulars, apply to
